The Division received a report from MSHA that the Operator had been washing their equipment and contaminated water is running down into the residents' irrigation water and their culinary collection point. The Division inspected the east pit and did not find any equipment for washing. There were no signs that water had flowed from the mine site into the creek. The Division inspected the west pit and did not find and washing equipment or signs that wash water had flowed outside the permit boundaries. The Division did look at the pump station. There was no evidence that wash water had entered the creek. The Division will close the investigation due to lack of evidence.
